Project #306: Variation of the Kite!

- Fold a rectangle paper half lengthwise.
- Cut off $\frac{1}{3}$ of the top part in a triangle shape on the open edge.
- Cut off $\frac{2}{3}$ of the bottom part in a triangle shape on the open edge.
- Draw lines from each point of the triangles if you like to create the "sticks" in the kite.
- Next place two circle stickers on either side of the points on the sides of Kite.
- Punch a hole into into each of these circles with a hole puncher.
- Next slide a slim stick through the holes such as chopsticks.
- Tie a string to each slotted end of the stick. This will be the handle for flying your kite.
- Attach lightweight ribbons or tissue streamers to the top and bottom parts of your triangle to make a nice finish for each end.
- Use felt markers, stickers, sparkles etc to decorate your kite.

Activity: Take your kite outside to fly it or you may also use Fans indoors to fly your kites on a rainy day. Go to a kite shop to view various kites.
