Project #542: Planet Earth!

(Project by Kids Care Preschool)

- Wet a coffee filter and flatten it out or use a circle of paper.
- Add some earth details by Drawing continent shapes or glue on the shapes that the adults or older children may make. Cut out the continent shapes
- Glue your shapes onto the circle as your earth.
- Try making this by using some QTips in paint to draw your earth continent shapes.
- Remember the Bodies of Water such as the Oceans as they are an important link and needs to the continent!
- When your earth is dry, try adding some 3D effects such as crumpled paper or soil for texture.
- Try adding some plastic or cellophane paper onto your water bodies.
- Or add waves in the water with cotton or white paint with QTips!

Activity:

Go outdoors and enjoy an Earth Day Walk! Notice nature verse's man made structures. Discuss things that we need: Food, Shelter and Clothing are the three basic necessities! Make sure to note the garbage bins and the recycle bins!
