Project #559: Musical Chairs!

- Set up some easy to move Chairs in a square, rectangle or circle shape.
- Play some music while children walk around the chairs.
- Stop the music and all children quickly need to sit on a chair.
- Next take one or two chairs away.
- Play music again. Children sit once again.
- The children whom did not get a chair to sit on can then watch the others.
- Continue this until there is only one chair left with two players.
- The last one to sit on the last chair is the winner and all can congratulate the winner.
- Play it again. Some children will need help with this so it is good that the children are at the same level of understanding and also may help one another.

Activity: Children may help set up and choose the various chairs that may be used. Try stools as well or ottomans may be easier for the younger children.
