Project #581: Paper Eyeglasses!

- Create your own paper (heavier weight) eye glasses for viewing nature outdoors or indoors.
- There are premade firm paper glasses you may purchase for this project as shown below. These may have some cellophane paper across the viewing area.
- Decorate your "Eyeglasses" with some sparkles, pens and possibly with a glue stick and small lightweight paper flowers or feathers.
- Stamps are also good for this.
- Try some stickers as well.
- Sparkle glue works well for this.
- You may like to add some drops of sparkle glue to the cellophane part of the viewing area to see with "Sparkles"
- Try making some eyeglasses out of poster boards.
- Use various colours and glue some coloured cellophane on the viewing area.

Activity:

Go on a viewing search such as "Bird Watching" Try looking at the trees, grass and sky as well. Where would you find birds. Maybe you will spot a nest or other items in the trees....
