

Ann's Creative Corner

Project #596: Community and Houses!

- Provide children with a variety of paper shapes such as squares, rectangles, circles and triangles
- Children may glue these onto a piece of construction paper to form their own houses and buildings.
- There could be one house or more houses and buildings in their project.
- Children may also add details to the houses by drawing the doors, windows etc.
- Add some people if you like.
- Add a yard and a garden maybe.
- Try making a 3D house with boxes and cardboard. Glue or tape the pieces together.
- Make a 3D map and a small town or city of buildings.

Activity: Browse your neighbourhood. Browse the Stores. Go to a Mall. Take a walk and see the construction of houses and buildings.
