Project #618: Spiders and Webs!

- Make a spider web design by squirting white liquid non-toxic glue onto a plastic container.
- When dry, pull it off carefully and you will have your spider web.
- Try glueing this carefully onto a piece of waxed paper.
- Now it is time for you sticker spiders to crawl around.
- Make a spider from pipe cleaners.
- Make a spider from construction paper.
- Remember spiders have 8 legs!
- Making a spider web from some cotton is another idea.
- Pull the cotton balls into strips and see what you can make.
- Handprint Spiders! Paint your hand and add details!

Activity: Go on a Spider search!

Go for a local walk to find spiders. Be careful and do not pick them up as some can bite. Be respectful and observe. Be gentle as spiders have a place and purpose too. Notice if they have caught anything in the web.

Song: Incy Weensy Spider

The Incy weensy spider climbed up the water spout.
Down came the rain and washed the spider out
Out came the sun and dried up all the rain
So the incy weensy spider climbed up the spout again!
