### Project #648: Teddy Bears!

- Cut out the basic shape of a Teddy Bear.
- Children can colour it.
- Add some felt pieces with non-toxic liquid white glue.
- Add some fur by using short strands of wool. Various colours may be used.
- Add more details such as a paper hat or a scarf.
- Try making a teddy bear shape by providing the parts of the Teddy bear for the children to glue together.
- You may like to have the parts such as arms and legs moveable so in case you may like to use a flexible insert to attach the arms and legs.
- Bring your own Teddy Bear or bears as a sample to view.
- Make some basic felt bears for a story.
- Children can make up a story.
- Count how many bears you and family and friends are making.
- What colours are they?

#### Activity: Teddy Bear Picnic!

Everyone that would like to bring their own special Teddy to the Picnic may do so. Place a blanket on the floor or have a picnic in a tent with your favourite bear and also include your other bears too!
