

## Ann's Creative Corner

### Project #666: Ball, Marble Painting!

- Provide Children with a washable recycle type tray.
- Place a sheet of paper in the tray.
- Add some drops of non-toxic liquid paint.
- Provide children with various types of balls or large marbles (be sure the marbles are very large as this could be a choking hazard for your children and Toddlers)
- Children may choose the balls or marbles they like.
- Place them on the paint in the tray and start to tip the tray diagonally without turning the tray over.
- Try using one colour at a time if you like.
- Try one ball, then two etc.
- Or place two or three colors on the tray. Primary colours are the best for this as they mix into all colours.
- When you are done swirling, you may like to add some sparkle to this by shaking them on before the paint is dry.
- Also try tissue paper as it will stick to the wet paint.

#### Books:

There are many books on colours to read to the children. Also some flashcards with colours would be nice.

#### Felt Story: "Inside the Red House"

Inside the Red House there was a \_\_\_\_ house. (place the next size house on top of the larger red house.

Inside the \_\_\_\_ House there was a \_\_\_\_ house.

Continue this until all houses are in the houses.
