Project #667: Pet Collage!

- Gather some photos, calendars and magazines.
- Find some pet pictures as well as pet foods, activities, and maybe a pet domain such as a dog house, barn, fields etc.
- Cut around the picture to prepare it for your collage.
- Photos may be used as they are as well.
- Children may cut at various stages so encourage cutting around the picture even if it is widely around it. Details are not necessary.
- Using glue sticks, glue these pictures or photos onto a poster board or construction paper.
- This is great as a group project with a large poster board.
- Have everyone share the pictures they like.
- Add more details by drawing things such as flowers, grass, trees and other nature ideas.
- If you choose to do an indoor type scene, draw what may be indoors.

Activities: Find magazines, calendars and photos together. Go for a walk and notice various animals. Go to a farm to view the animals and their habitat.
